

PODS — Plant Observer & Diagnostic System | Customer Interface Overview

Customer Interface

The Customer Request & Response Logic realizes a rich, and user-friendly User Interface Logic. Similarly to that, the System Administration Logic ensures a simply and safe system administration.

The customers communicate with the system via Web-services. Smartphones with Android operating systems, iOS devices can be used in the same way.

There are no restrictions between tablets which can be used: wide browser-compatibility will be implemented. The system is also available via desktop computers.
